2023 Art Winner

"Steps Toward Equality"

"Ruth Bader Ginsburg lived a life of unrelenting excellence in the face of hardship. She was a machine, with an almost perfect academic record that she carried into a highly successful career, but she was a human, persevering against the odds, fueled by a passion for equality and women's rights. She was strong in the face of blatant sexism, and fought her way through a hostile educational system while remaining at the top of her class. She was the embodiment of what the Supreme Court represents - justice."
